Traded public companies – list of past and present shareholders

This section should show the shareholders that hold at least 5% of any class of share(s) of the company at the date of this return. It should only be completed by public companies that have traded on a regulated market at any time during the period of this return.

Changes during this period to shareholders' particulars or details of the amount of stock or shares transferred must be completed each year.

You must provide a 'full list' of all company shareholders on:

- The company's first annual return following incorporation
- Every third annual return after a full list has been provided

Further shareholders
Please use a 'Traded public companies – list of past and present shareholders' continuation page if necessary.

APR 1 1954

1. Introduction

The purpose of this study is to determine the effect of the new drug on the growth of the rat.

2. Materials and Methods

A total of 24 rats were divided into two groups of 12 rats each.

The first group was given the new drug and the second group was given a placebo.

3. Results

The rats given the new drug showed a significant increase in weight compared to the rats given the placebo.

The mean weight of the rats given the new drug was 150 grams, while the mean weight of the rats given the placebo was 120 grams.

The difference in weight between the two groups was statistically significant (p < 0.05).

These results suggest that the new drug has a stimulatory effect on the growth of the rat.

4. Discussion

The results of this study are consistent with the hypothesis that the new drug has a stimulatory effect on the growth of the rat.

This study was supported by a grant from the National Institutes of Health.
