NOTES TO THE ABBREVIATED ACCOUNTS FOR THE YEAR ENDED 5 APRIL 2013

1. ACCOUNTING POLICIES

1.1 Basis of preparation of financial statements

The full financial statements, from which these abbreviated accounts have been extracted, have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008) and the requirements of the Statement of Recommended Practice "Accounting by Limited Liability Partnerships"

1.2 Turnover

Turnover comprises revenue recognised by the LLP in respect of bio ethanol related consultancy services supplied during the year, exclusive of Value Added Tax and trade discounts

1.3 Revenue expenditure

Revenue expenditure consists of service costs for the proposed design, establishment and operation of bio-ethanol production plant. Such expenditure is deferred and carried forward in the balance sheet either as a prepayment or as work in progress to the extent that there is reasonable certainty that it will be recovered under contractual arrangements. In the absence of such reasonable certainty, the expenditure is charged to the profit and loss account in the period in which it is incurred.

1.4 Taxation

Taxation on all partnership profits is solely the personal liability of the individual members. Consequently neither taxation nor deferred taxation arising in the partnership has been accounted for in these financial statements.

1.5 Stocks

Long-term contract balances are stated at cost incurred, net of amounts transferred to cost of sales, after deducting foreseeable losses less any applicable payments on account. The asset is only recognised to the extent that the future economic benefits that the partnership will receive can be reliably estimated with reasonable certainty.

The estimate of the future economic benefits attributed to the long-term contract for stock is the estimated present value of the future cash-flows that the partnership will receive as a result of the long-term contract costs incurred, discounted at an appropriate discount rate reflecting the risk of those cash-flows, and the time value of money. The valuation is based on forecasts created by third parties who are experts in the market to which the long-term contract relates.

The underlying assumptions to which the estimate is sensitive are the discount rate used, and the assumptions regarding the level of future revenues that will accrue to the partnership as consideration for their work done. No account is taken of future revenues where the degree of certainty that they will arise is insufficient to provide any reliable estimate.

The amount recorded as turnover in respect of long-term contracts is ascertained by reference to the value of the work carried out to date. Attributable profit is recognised as the difference between recorded turnover and related costs.

NOTES TO THE ABBREVIATED ACCOUNTS FOR THE YEAR ENDED 5 APRIL 2013

1. ACCOUNTING POLICIES (continued)

1.6 Members' Capital

The financial statements have been prepared in accordance with the requirements of FRS 25 as applied to limited liability partnerships by the applicable SORP. Since the profits of the limited liability partnership are, under the terms of the Amended LLP Agreement, distributed at the discretion of the LLP, FRS 25 requires members' capital to be disclosed as equity. There is also no entitlement for members to draw out, or receive back at any time while they are members of the limited liability partnership, the amounts contributed by them as capital.

1.7 Members' remuneration

Members' remuneration is any outflow of benefits to a member. Where the payment of any remuneration is not at the discretion of the limited liability partnership, this is charged to the profit and loss account as an expense.
