Notes to the Accounts
for the year ended 31 March 2001

1 Accounting policies

The accounts have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective March 2000).

Turnover

Turnover represents the invoiced value of goods and services supplied by the company, net of value added tax and trade discounts.

Deferred taxation

Provision is made for deferred taxation using the liability method to take account of timing differences between the incidence of income and expenditure for taxation and accounting purposes, except to the extent that a liability to taxation is unlikely to crystallise.

Investment properties

In accordance with Standard Accounting Practice investment properties are revalued annually and the aggregate surplus or deficit is transferred to a revaluation reserve. No depreciation or amortisation is provided in respect of freehold investment properties and leasehold investment properties with over 20 years to expiry. The directors consider that this accounting policy results in the financial statements giving a true and fair view. Depreciation or amortisation is only one of many factors reflected in the annual valuation and the amount which might otherwise have been shown cannot be separately identified or quantified.
