DEPARTMENT OF CHEMISTRY

RECEIVED
JAN 10 1964

TO THE DIRECTOR, UNIVERSITY OF CHICAGO
FROM: [illegible]
SUBJECT: [illegible]
[The following text is extremely faint and largely illegible due to the quality of the scan. It appears to be a letter or report containing several paragraphs of text, possibly discussing chemical research or a specific experiment. Some words like "reaction", "product", and "analysis" might be discernible in certain sections.]

Company Number

† Directors only.

† Other directorships

NOTES

Show the full forenames, NOT INITIALS. If the director or secretary is a corporation or Scottish firm, show the name on surname line and registered or principal office on the usual residential line.

Give previous forenames or surname(s) except:

- for a married woman, the name by which she was known before marriage need not be given.
- for names not used since the age of 18 or for at least 20 years

A peer or individual known by a title may state the title instead of or in addition to the forenames and surname and need not give the name by which that person was known before he or she adopted the title or succeeded to it.

Other directorships.

Give the name of every company incorporated in Great Britain of which the person concerned is a director or has been a director at any time in the past five years.

You may exclude a company which either is, or at all times during the past five years when the person concerned was a director, was

- dormant
- a parent company which wholly owned the company making the return, or
- another wholly owned subsidiary of the same parent company.

[illegible]

Journal of Management Inquiry 18(6)

1990

• • •

1. The first step in the process of identifying a problem is to define the problem clearly. This involves identifying the symptoms, the scope of the problem, and the impact it is having on the organization. Once the problem is defined, the next step is to gather information about the problem. This can be done through interviews, surveys, and other research methods. The information gathered should be used to identify the causes of the problem and to develop a plan of action to address the problem. The final step in the process is to implement the plan of action and to monitor the results. This involves setting up a system of controls to ensure that the plan is being followed and that the problem is being resolved. Once the problem is resolved, the system of controls should be reviewed and updated as needed to prevent the problem from recurring.
