3 PRINCIPAL ACCOUNTING POLICIES

Income from fixed asset investments

Investments

Investments are recognised initially at fair value which is normally the transaction price. Subsequently, they are recognised at cost less impairment unless a reliable measure of fair value becomes available.

Debtors

Short term debtors are measured at transaction price, less any impairment. Loans receivable are measured initially at fair value, net of transaction costs and are measured subsequently at amortised cost using the effective interest method, less any impairment.

ABC3 Limited

NOTES TO THE FINANCIAL STATEMENTS AS AT 31 DECEMBER 2016

3 PRINCIPAL ACCOUNTING POLICIES (CONTINUED)

Taxation

Taxation expense for the year comprises current and deferred tax recognised in the year. Tax is recognised in the income statement, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case tax is also recognised in other comprehensive income or directly in equity respectively.

Current or deferred tax assets and liabilities are not discounted.

Current tax is the amount of income tax payable in respect of the taxable profit for the year or prior years. Tax is calculated on the basis of tax rates and laws that have been enacted or substantively enacted by the year end.

Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred tax arises from timing differences that are differences between taxable profits and total comprehensive income as stated in the financial statements. These timing differences arise from the inclusion of income and expenses in tax assessments in years different from those in which they are recognised in the financial statements.

Deferred tax is recognised on all timing differences at the reporting date except for certain exceptions. Unrelieved tax losses and other deferred tax assets are only recognised when it is probable that they will be recovered against the reversal of deferred tax liabilities or other future taxable profits.

Deferred tax is measured using rates and laws that have been enacted by or substantively enacted by the year end and that are expected to apply to the reversal of the timing difference.
