Mrs Alison Manson - Director

### NOTES TO THE ABBREVIATED ACCOUNTS FOR THE YEAR ENDED 31 MAY 2015

#### 1. ACCOUNTING POLICIES

#### Accounting convention

The financial statements have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008).

#### Turnover

Turnover represents the amounts derived from the provision of services which fall within the company's ordinary activities and is stated net of Value Added Tax, as adjusted to the flat rate percentage.

#### Tangible fixed assets

Depreciation is provided at the following annual rates in order to write off each asset over its estimated useful life.

#### **Deferred** tax

The tax expense represents the sum of the corporation tax and deferred tax charge for the year.

The tax currently payable is based on taxable profit for the year. The company's liability for current tax is calculated using the tax rates that have been enacted or substantively enacted by the balance sheet date.

Deferred tax is measured on differences between the carrying amounts of assets and liabilities in the accounts and the corresponding tax bases, as used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all temporary timing differences that have originated but not reversed by the balance sheet date and are not recognised as permanent differences. Deferred tax assets are recognised to the extent that it is probable that taxable profits will be available in the future. Deferred tax is calculated at the average tax rates that are expected to apply in the periods in which the timing differences are expected to reverse, based on tax rates and laws that have been enacted or substantively enacted by the balance sheet date. Deferred tax is charged or credited in the profit and loss account, except when it relates to items charged or credited directly to equity, in which case the deferred tax is also dealt with in equity.'
