Turnover

Turnover represents amounts receivable for goods sold and services rendered during the year, exclusive of value added tax.

Goodwill

Goodwill, being the amount paid in connection with the acquisition of a business in 2010, is being amortised evenly over its estimated useful life of twenty years.

Tangible fixed assets

Depreciation is provided at the following annual rates in order to write off each asset over its estimated useful life.

Stocks

Stocks are valued at the lower of cost and net realisable value, after making due allowance for obsolete and slow moving items.

Deferred tax

The payment of taxation is deferred or accelerated because of timing differences between the treatment of certain items for accounting and taxation purposes. Deferred tax assets are recognised only to the extent that they will be recovered against the reversal of deferred tax liabilities or other future taxable profits. Full provision for deferred taxation is made under the liability method, without discounting, on all timing differences that have arisen, but not reversed by the balance sheet date, unless such provision is not permitted by accounting standards.

In accordance with such standards deferred tax is not provided for:

- a) revaluation gains on land and buildings, unless there is a binding agreement to sell them at the balance sheet date; and
- b) gains on the sale of non-monetary assets, if the taxable gain will probably be rolled over.

Pension costs and other post-retirement benefits

The company operates a defined contribution pension scheme. Contributions payable to the company's pension scheme are charged to the profit and loss account in the period to which they relate.
